

A blurred background image of a restaurant interior with several tables and chairs, some with white tableware. The image is semi-transparent and serves as a backdrop for the text.

Restaurant Management System

AIMS ERP

Digitalize Your Business

INTRODUCTION

Restaurant Management System is a new generation of restaurant management software. It is a complete solution, beginning with taking orders from customers, and ending with billing and tax reports. The user interface is carefully optimized for high speed input of a customer order and the prevention of common mistakes. Payments can be accepted by cash, credit cards, or checks. For managers, there is a rich set of reports that shows a complete picture of restaurant operations and life cycles, Consumption, most active employees , payment methods, and automatic tax calculations. By standardizing the entire restaurant management process, the software radically improves serving speed. It's easy to install and easy to use.

AIMS ERP

AIMS ERP Restaurant Management Software is an application that can be used for restaurants, café, Fast food, takeaways and dine-ins locations. It is a complete stack of technology, restaurant software and marketing modules that you will need to manage your business. It takes over the operations and marketing of your business. We will be breaking down all the units that comprise a successful restaurant stack and drill down very deep into it to provide you a holistic picture of all that you need.
